

MASON GRAJCZYK

SUMMARY

Computer Engineering student with hands-on experience in system configuration, software deployment, and custom hardware assembly. Adept at utilizing advanced operating systems, containerization, and complex server stacks to build, manage, and troubleshoot technical environments. Seeking to leverage strong analytical problem-solving skills, quality control experience, and a passion for technological systems integration

TECHNICAL PROJECTS

- **Server Architecture & Deployment:** Designed, configured, and managed self-hosted server environments utilizing containerization to optimize resource allocation, ensure high system uptime, and streamline network routing.
- **Software Development & Integration:** Developed custom software modifications and integrated various application programming interfaces (APIs), demonstrating strong proficiency in programming logic, system architecture, and self-directed problem-solving.
- **System Diagnostics & Environment Virtualization:** Applied advanced troubleshooting techniques to resolve complex software faults and operational conflicts. Engineered isolated virtual environments to ensure stable and precise deployments of resource-heavy technical software.

EXPERIENCE

Outdoor Adventure's

NDSU Wellness Center | Fargo, ND | August 2023 - Current

- Trained new staff on rigorous safety protocols and ensured strict adherence to risk management regulations during operations.
- Managed detailed inventory, organization, and functional quality checks on technical equipment including backpacks and sleeping bags.

Medical Records Technician

OGL | Edina, MN | June 2024 - August 2025

- Managed the indexing and electronic storage of critical documentation, employing strong problem-solving skills to resolve discrepancies and ensure the accuracy of patient records.
- Compiled complex data from multiple sources into comprehensive profiles, streamlining retrieval processes for authorized departments.
- Directed efficient daily operations by managing necessary supply inventories and optimizing organizational workflows.

Meat Clerk

Hy-Vee | Plymouth, MN | July 2021 - August 2025

- Managed customer orders with precise preparation while operating equipment under strict safety and sanitation guidelines.
- Demonstrated reliable time management, multitasking, and problem-solving adaptability in a fast-paced retail environment.

EDUCATION AND TRAINING

Bachelor of Science

Computer Engineering
North Dakota State University, Fargo, ND

TECHNICAL SKILLS & COMPETENCIES

- **Programming & Languages:** Java, VHDL, MATLAB.
- **Engineering Concepts:** Custom computer assembly, hardware troubleshooting, system diagnostics, data analysis.
- **Professional Skills:** Complex problem-solving, operational management, quality control analysis, adaptability, safety compliance.
